EDUCATION

University of California, Davis

California, United States

Bachelor's Degree in Statistic (Data Science Track), Overall GPA: 3.635/4.0

09/2021 - 03/2025

Major Courses: Calculus, Elementary Statistics, Scientific Reason, Intro to Programming, Regression Analysis, Linear Algebra, Analysis of Variance, Math Statistics, Anly Categor Data, Stat Data Technologies

University of Southern California

California, United States

Master's Degree in Economic and Data Science, Current GPA: 3.75/4.0

08/2025 – Present

Major Courses: Machine Learning; Data Management; Econometrics; Microeconomic Analysis

INTERNSHIP EXPERIENCE

Hungry Panda

Davis, CA

Business Development & Marketing Intern

05/2025-07/2025

- Developed partnerships with local restaurants and beverage shops to support merchant acquisition and promotional campaigns in the Davis market.
- Built and managed a 500+ member WeChat community, increasing local user engagement and contributing to a 10% lift in brand awareness.

China Industrial Bank (Hefei Yaohai Branch)

Anhui, China

Loan Department Intern

07/2024 - 08/2024

- Assisted with credit loan processing by reviewing personal credit reports to evaluate merchant loan limits;
- Supported customer loan application procedures while maintaining attention to documentation accuracy and process consistency.

University of Science and Technology of China - Library Language and Education Center

Anhui, China

Teaching Assistant

07/2024 - 08/2024

- Assisted faculty with classroom teaching, lecture delivery, student tutoring, and task coordination.
- Contributed to the successful delivery of an English communication program by supporting USTC students in developing practical spoken English skills.

PROJECT EXPERIENCE

Mini SQL Engine for Health Data Exploration| Python, SQL Parsing, CSV Processing

05/2026

- Built a lightweight SQL query engine in Python from scratch, implementing custom CSV parsing, column-oriented in-memory storage, SELECT projection, WHERE filtering, GROUP BY aggregation, and inner joins.
- Applied the engine to a 253,680-row health indicators dataset to explore relationships among BMI, physical activity, age, income, healthcare access, and heart disease outcomes.
- Validated core relational operations with test scripts covering projection, filtering, aggregation, joins, and SQL-style query execution.

Interactive Data Visualization| R, Plotly, Mapbox, Crosstalk, HTML/JavaScript

12/2024

- Built an interactive rental-market explorer for 600 Sacramento-area Craigslist listings, linking geographic location, price, square footage, and property-level details.
- Developed synchronized Mapbox and Plotly visualizations with click-based highlighting, enabling users to select a rental unit in either the map or scatter plot and inspect the corresponding listing.
- Implemented JavaScript callbacks and dynamic HTML tables to display listing metadata on user interaction, improving exploratory analysis and user engagement.

EXTRACURRICULAR ACTIVITY

UCD Live Chinese Students and Scholars Association

California, United States

Editorial Team Member

09/2024 – 06/2025

- Edited posts for Red Note, participated in on-campus events organization.

AWARDS & HONORS

Dean's Honor for two consecutive years in 2021 and 2022, UCD-College of Engineering
